MEDIA ALERT: Statement from SuperSpeed Golf

At SuperSpeed Golf, LLC we are committed to providing the best speed training equipment for the golf market. We are dedicated to an evidence-based approach in the development of our products and messaging about the expectations for use of our products.

As the leader in the golf speed training space for many years, we also feel a responsibility to monitor the space for the good of the consumer. With the rise of many additional speed training systems over the past few years, we have consistently maintained the position that these additional brands feature small differences in approach, design and benefits, and that the increased competition will benefit all the companies in the space in the long run. However, we do feel that it is important that all companies in the speed training space act responsibly when it comes to communicating expected and typical results of the use of their speed training products.

To help maintain the integrity of the speed training space, we at SuperSpeed Golf, LLC recently filed a lawsuit against The Stack System GP, Inc. and The Stack System, LP, offering the Stack System.
